Technical Specialist, Active Implantable Medical
Devices, British Standards Institute.

About the Webinar: In the modern world, intellectual property rights have a significance on international trade and indigenous trade of every nation. The importance of intellectual property (IP) in the modern world goes far beyond the protection of the creation of mind. IP is a powerful tool of economic growth by stimulating creativity and innovation, generating revenue, promoting investment and enhancing culture. Strong IP laws make a huge contribution to both the overall economy of the country and their respective states.

EDITORIAL NOTE

The world is passing through a phase of inventions and innovations. Countries in all stages of development are investing heavily in research and development in almost all fields of study. The high level of competition in the fields of research, inventions and innovations brings the risks associated with intentional or unintentional duplication of an ongoing or completed work. It is in this context the discussion and understanding of Intellectual Property Rights (I.P.R.) becomes all the more important. Recognising the importance of this concept the different accrediting agencies too are encouraging the Higher Education Institutions to organise orientation and knowledge sharing sessions for faculty, staff and students.

The institute is happy to collaborate with Anjuman-e-Islam College, Vijayapur to conduct the International Webinar on Intellectual Property Rights (I.P.R.). As per the theme of the webinar the International and National Perspectives were critically explained by the invited resource persons for U.S.A and India. The practical knowledge of the resource persons in this field made the sessions very fruitful for the participants. The invited papers too covered the different dimensions of I.P.R. with reference to Constitutional provisions, Cyber Crimes and others.

The present special volume of SAJMR is the outcome of this important academic exercise. The publication of the research articles will be a handy reference for all those who participated in the proceedings of the webinar but also to are undertaking deeper research in this field. We hope the present special issue serves this intended academic purpose.
